Coarse Fish Price List - 2022

Common & Mirror Carp

We supply both 'float and maggot' sized carp for stocking day fisheries and bigger specimen carp for the big fish boys.

The angling response you get for each pound that you spend on these farmed carp is much greater than by stocking with other species or any wild caught fish.

We will grade the size of the 1-3lbs fish to suit your needs.

Big Common & Mirror Carp

We grade off the very best one percent of the three year old carp from our main farm in Shropshire and grow them on our new fish farm in Dorset to produce big carp. They are our best carp. They are beautiful fast growing fish that have never seen a hook before and will enhance any specimen carp lake and grow on to be monsters.

F1 Hybrids

These fish are a cross between a carp and a crucian carp but look just like a common carp. They behave quite differently to normal carp. They feed higher up the water column and feed more freely in the winter giving year round sport. They don't grow to more than a few pounds and are increasingly popular with both day ticket and match fishermen. They are not affected by KHV which is helpful in some fisheries that have been unlucky and are perfect for high density match fisheries.

Crucian Carp

What fisherman hasn't had his day brightened up by one of these Golden Beauties? These Crucian carp are produced from our own genetically pure brood stock.

Perfect fish for non-intensive fisheries. They love weedy waters.

Our favourite fish! These bottom feeders thrive in lightly stocked lakes rather than intensive carp fisheries and will grow to well over 5lbs.
